Quality management system is certified with ISO 9001:2015 and ISO 13485:2016 standards

European Quality Certificate
CE 538571, issued by British Standards Institution (BSI)
Modular multifunctional psychophysiological telemetric system "Rehacor-T":

- Registration of various parameters by 4 channels with the main patient transceiver-recorder ABP-4.
- Increasing the number of recorded parameters to 16 by using additional wireless units, modules and sensors.
- Quality parameters’ record by means of electrodes and sensors from the device "Rehacor-T" set, as well as using the original EEG electrodes, electrode systems and other accessories from the set of EEG electrodes ES-EEG-10/20 "Encephalan-ES", which is a part of the psychophysiological telemetric system " Rehacor-T".

Application modes of psychophysiological telemetric system "Rehacor-T":

- telemetric (wireless interface technology Bluetooth®);
- autonomous (recording data onto the memory card – Holter-type);
- autonomous-telemetric (data backup onto the memory card of the patient transceiver-recorder during telemetric registration).

Enhanced functionality and application of psychophysiological telemetric system "Rehacor-T" in clinical practice, sports, industrial and institutional medicine, psychophysiology and scientific research are provided by a basic autonomous transceiver-recorder ABP-4, additional wireless units, modules, sensors and accessories, along with methodical software (SW) from system set.

| 1.1    | A_6038   | "BFB-telemetric" set includes:  
- **Autonomous patient transceiver-recorder ABP-4**: 4 universal polygraphic channels, 1 movement activity channel (integrated), telemetric interface (BlueTooth®) of PC connection (USB-port) to additional wireless devices;  
- **Accessories**: wireless PC Adapter "IB-4" (USB–Bluetooth), rechargeable batteries set (type – AA, 2 pcs., including 1 additional), charger, emulator, N electrode cable.  
- **Operation documentation**  
- **Patient data management – "Cardfile".** | **Provides**: connection with additional wireless units, modules and sensors  
Set A_6038 (depending on application) should be supplemented with:  
sensors, electrodes and accessories; required software; accessories, wireless modules; computing hardware. |
1.2 A_6038-2  

"Autonomous-Telemetric" set includes:

- **Autonomous patient transceiver-recorder ABP-4**: 4 universal polygraphic channels, 1 movement activity channel (integrated), telemetric interface (BlueTooth®) of PC connection (USB-port) to additional wireless devices;
- **Memory card and function of autonomous data recording onto memory card.**
- **Accessories**: wireless PC Adapter "IB-4" (USB–Bluetooth), rechargeable batteries set (type – AA, 2 pcs., including 1 additional), charger, emulator, N electrode cable.
- **Operation documentation**
- **Patient data management – "Cardfile".**

<table>

Provides:
- telemetric connection to the base station (PC) for registration quality control during the attachment of sensors and electrodes;
- connection with other modules during the study;
- transfer of recorded data from the memory card to the base station after the study.

Set A_6038-2 (depending on application) should be supplemented with set of electrodes and sensors; required software; accessories, wireless modules; computing hardware.
## Additional accessories of psychophysiological telemetric system "Rehacor-T"

### 2.1 A_5346 USB Power Supply Adapter
- For ABP-4
- **Power from PC USB:**
- **From mains (220V, 50Hz).**
- For stationary use, alternatively to autonomous powering from accumulators.
- Can be used with ABP-4; Wireless pulse oximeter module.

### 2.2 A_5362 Table support for ABP-4
- **The set** includes a clamp and a bag.
- At customer's option

### 2.3 A_2329 SW-key (USB)
- Allows working with software at any additional PC, including network variant.
### 3. Software "Rehacor" for functional biocontrol with biofeedback; required equipment and accessories

<p>| | | |</p>
<table>

<tr>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
</table>
| **3.1** | **A_1010-01** | "Rehacor" Software for Functional Biocontrol with Biofeedback Training, "Basic" Suite  
Software provides procedures of functional biocontrol with biofeedback (BFB training) with the control of various physiological parameters for:  
- non-medicated restoration of damaged functions;  
- improvement of nerve regulations in different diseases, phobias, pathological addictions;  
- improvement of stress resistance;  
- control and correction of psychophysiological state in different situations and sicknesses;  
- forming the optimal state for performance for sportmen, persons with stressful and responsible jobs;  
- overcome the attention deficit hyperactivity disorder (ADHD) in children and adolescents.  
SW contains procedure library and procedures editor, which allow changing procedures and creating new ones. |
| Requires purchasing of: | electrodes, sensors and accessories from the ABP-BFB kit.  
additional impedance adapters with sensors to work with biofeedback training procedures by circulatory parameters (ICG and impedance plethysmography). |
| **3.2** | **A_1010-02** | "Rehacor" Software for Functional Biocontrol with Biofeedback Training, "Professional" Suite  
Extended suite of procedures library, using features of ABP-4 and additional wireless modules for multichannel EEG and other parameters registration. In addition to "Basic" suite it contains **neurofeedback procedures**:  
- for functional brain asymmetry;  
- optimization of brain rhythms and zonal differences of alpha-rhythm;  
- very low frequency brain activity;  
- combined training for brain electric activity and cerebral blood flow (REG);  
- multiparametric training for correction of psycho emotional state and psychological stress. |
| Requires purchasing of: | electrodes, sensors and accessories from the ABP-BFB kit.  
additional impedance adapters with sensors to work with biofeedback training procedures by circulatory parameters (ICG and impedance plethysmography), electrode systems like ES-EEG-4K-3 and accessories to them (from the set of EEG electrodes ES-EEG-10/20 "Encephalan-ES") for BFB procedures of neurobiocontrol;  
additional modules and sensors depending on type of multiparameter training |
### ABP-BFB electrodes, sensors and accessories kit – for "Rehacor" software

**Includes:**
- GSR sensor (length – 1.2 m);
- respiratory effort sensor (length – 1.2 m) – 2 pcs.;
- PPG sensor with fixers (length – 1.2 m);
- skin conductance sensor (length – 1.2 m);
- envelope EMG sensor (length – 1.2 m) – 2 pcs.;
- EMG or Skin Conductance cables from disposable electrodes (length – 1.2 m) – 2 pcs.;
- EEG bipolar cables with adhesive electrodes (length – 1.5 m) – 2 pcs.;
- cable for 1 ECG derivation for disposable electrodes (length – 1.5 m);
- temperature sensor (length – 1.2 m) – 2 pcs.;
- adhesive electrode paste;
- ECG, EMG disposable electrodes – 50 pcs.;
- brush for electrode cleaning;
- adhesive plaster Omnifix.

---

**Optional supply of sensors at customer’s option from this catalogue.**

Cable length can be changed on request.

</tbody>
</table>
| 3.7 | A_2804-2 | **Set of silicone tube caps for EEG/REG electrodes**  
Silicone tube caps to attach a small amount of EEG electrodes for contact gel and REG derivations for biofeedback procedures.  
**The set includes** caps of 3 sizes from 48 to 62. | From "Encephalan-ES" set  
For electrode system ES-EEG-4K-3A or electrodes with a cable for 2 EEG bipolar derivations. |
| 3.8 | A_6595-2 | **Electrode system ES-EEG-4K-3A(c)**  
with adhesive cup electrodes  
4 monopolar EEG derivations with adhesive cup electrodes for biofeedback procedures (neurofeedback) on brain functional asymmetry, optimization of brain rhythms and zonal differences of alpha-rhythm, very low frequency brain activity from "Professional" procedures library.  
**The set includes** adhesive plaster Omnifix. | From "Encephalan-ES" set  
For EEG registration in BFB training ("Rehacor" Software for Functional Biocontrol with Biofeedback Training)  
**Requires** electrode paste EC2, TEN-20 or similar.  
**For additional fixation** use Glue-collodion, glue remover and compact hair-dryer for quick gel drying (purchased individually at pharmacy or shop, consultations on demand). |
| 3.9 | A_4008-99 | **Wireless Electrostimulator**  
**The set includes:**  
- biofeedback procedure of stress resistance training;  
- battery (type – AAA, 4 pcs., including 2 additional). | Procedure of stress resistance training additional to the "basic" or "professional" library. |

**Software of system "Rehacor-T" for additional study types**

Software is used to assess the state of the autonomic nervous system and neurohumoral regulation of the patient, to evaluate the adequacy of physical and psycho-emotional stress taking into account the autonomic reactivity to a provoking effect, as well as to control the effect of medicinal drugs and efficiency of treatment prescribed.

Software uses standard recommended types of quantitative analysis and results representation in the form of cardiointervalogram trends (HR, RR), statistical and spectral parameters, hystograms and scattergrams (correlation rhythmograms) of RR-intervals allocation, spectrograms with frequency ranges that characterize the state of ANS and balance of sympathetic and parasympathetic sections (HF, LF, VLF).

There is an option of forming the formalized protocol with initial state description and autonomic reactivity. Software allows analyzing selected fragments of continuous ECG records (24 hrs, night recording) at long-term EEG studies or multiparameter monitoring.

**ECG Cable** for bipolar derivation with neutral electrode

3 snaps for disposable electrodes.
Length – 1.5 m.

[Diagram of ECG Cable]

Additional equipment is required

It can be used both independently and as concomitant software, related to the basic study.

**Requires** purchasing ECG cable (A_4740) if it is not included into delivery set.

Used for BFB training (software "Rehacor"), heart variability analysis (software "HRV") or for record under stationary conditions.
| 5.1 | A_5359 | **Poly-4 Wireless Module**  
Provides synchronous with ABP-4 data registration of signals via 4 polygraphic channels.  
**The set includes:**  
- rechargeable batteries (type – AA, 2 pcs., including 1 additional);  
- N-electrode cable.  
**Requires purchasing of:**  
- set of electrodes, sensors and accessories for Poly-4 module;  
- PG-ECG connector with derivation cables (A_4768);  
- set of fixing belts (A_7652). |
| 5.1.1 | A_4731 | **Simulator**  
Meant for technical verification of workability of Poly-4 module channels, as well as to check the connection between the Poly-4 module and the base transceiver-recorder ABP-4.  
**At customer's option** |
| 5.1.2 | A_5346 | **Mains Power Supply Adapter** for Poly-4  
Connected to a mains (220V, 50Hz) or USB port of computer equipment  
**For stationary use, alternatively to autonomous powering of Poly-4 module from accumulators.** |
